15. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Water is developed by means of an existing drilled well, Well Number W096. The well is 1,120 feet deep, and completed with 24-in. diameter casing, equipped with a 300 H.P. Centrilt motor, Centrilt submersible pump and totalizing meter, thence through a distribution system to the area included within the boundaries of the Las Vegas Valley Water District service territory for municipal and domestic purposes.

16. Miscellaneous remarks:

CNLV has constructed replacement production wells which are not yet operational. Permitting these applications will allow full use of CNLV groundwater rights using LVVWD production wells, completed within the Principal Aquifer, while reducing diversions from the Colorado River which has been impacted by persistent drought for over two decades.
